

ICON (ICX)

About : The ICON project is building one of the largest decentralized networks in the world. ICON is decentralized network where anyone can participate and connect to any blockchain. Through ICON, community that were isolated can connect and share various services through the network.

The ICON Network is comprised of various institutions ranging from: financial institutions, insurance companies, hospitals, universities and more. Each can each formulate their own governance system, while remaining connected through the "loopchain". Its native token is ICX.

Advantage : ICON is scalable, working to provide solutions for companies of any size. It works without an issue with Bitcoin, Ethereum, and other traditional blockchains. At the same time, it also works seamlessly with other third-party blockchain networks linked to the real world. This allows ICON to combine the real world with the crypto-world, opening up possibilities for businesses and connectivity.

Goal : The ICON project wants to "Hyperconnect the World" by "building one of the largest decentralized networks in the world."
