

Power Ledger (POWR)

About :

Founded with over 100 years combined energy industry experience, Power Ledger develops cutting-edge blockchain energy solutions for the people of the world.

Power Ledger boasts five products: xGrid, uGrid, Power Port, C6 and C6+, and Asset Germination, with one still in development, VPP2.0, an expansion of virtual power plants. These products provide different energy solutions, all on the blockchain.

Advantages :

We exist to empower and to provide individuals and communities with access to electricity that is low-cost, reliable, and renewable.

A system that allows you to choose the source of your electricity. To be part of an economy where households that generate electricity can trade with their neighbours and get a fair return on their investment. Where electricity is stable, affordable and available to everyone. Where transactions are transparent, automated and easy to understand.

Goal : Our mission is to help facilitate renewable energy projects through technology, to connect and empower individuals and communities.
